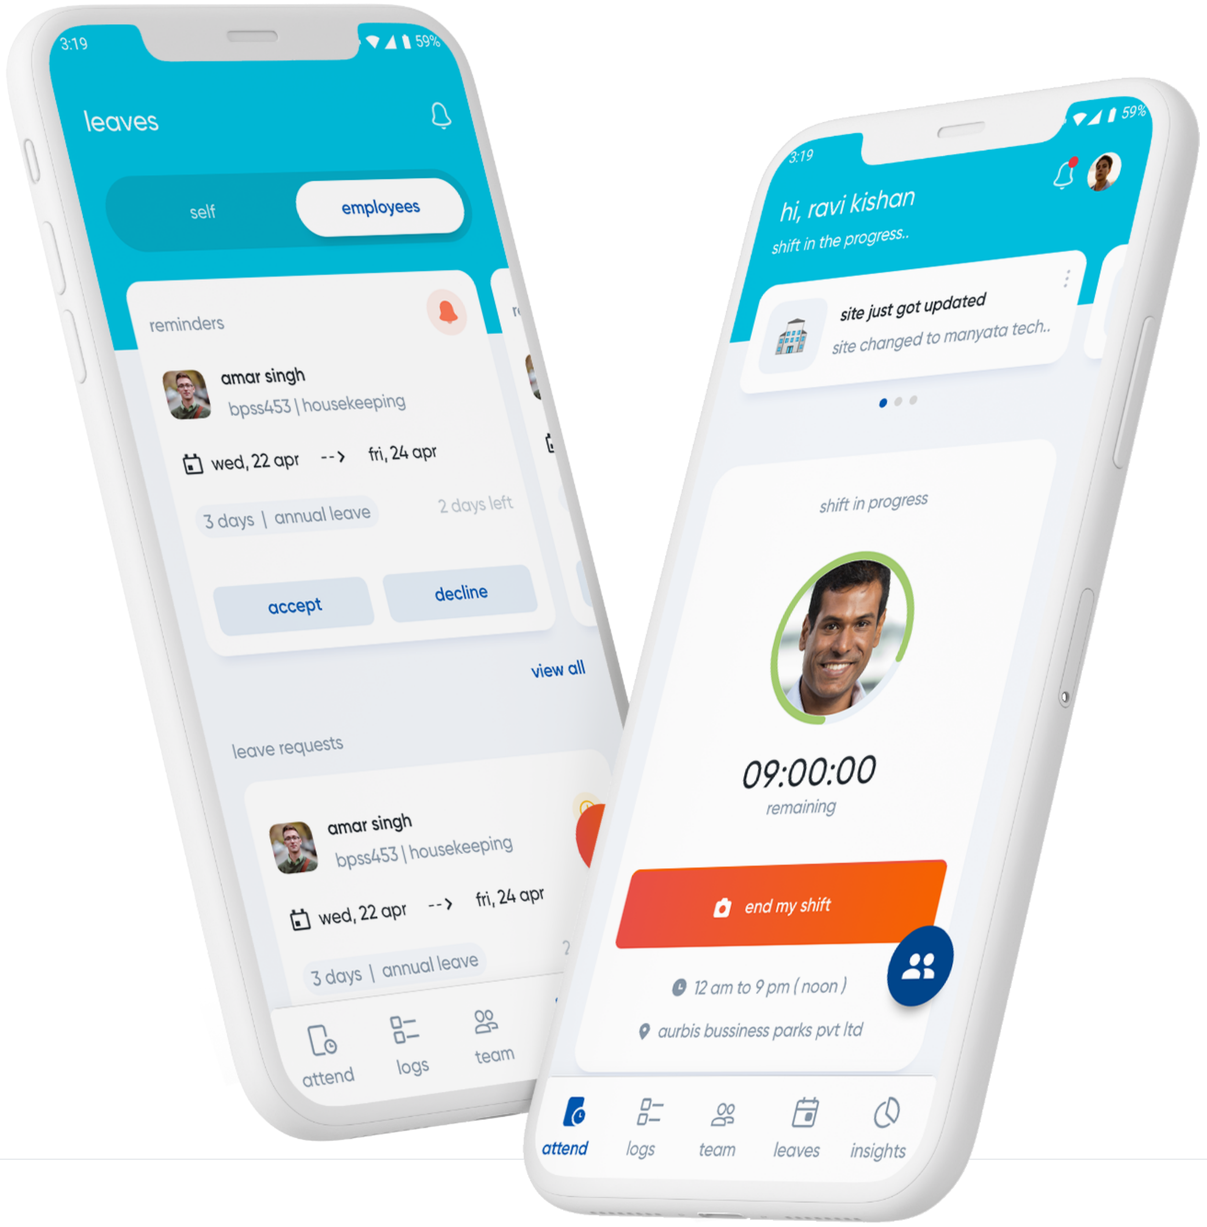
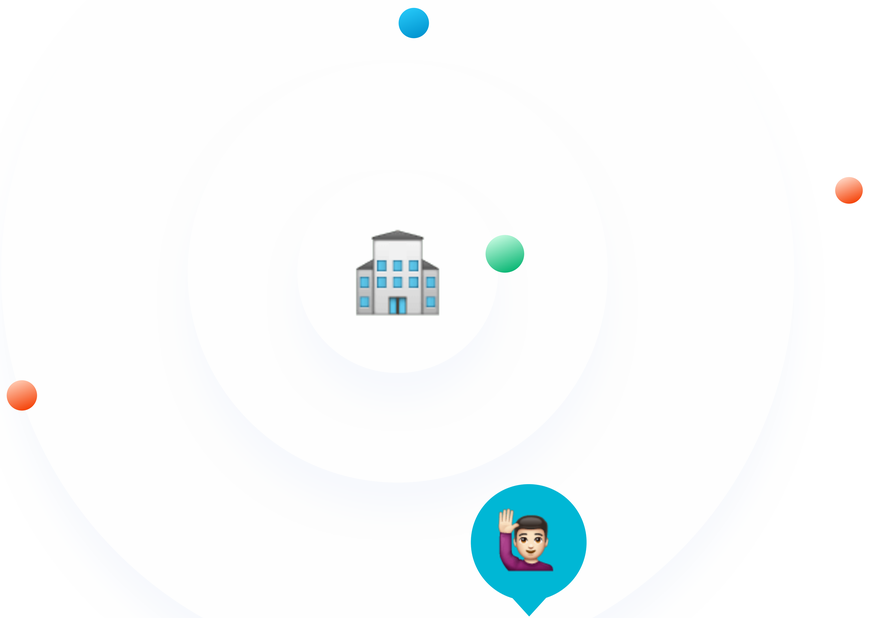
Attendance Marking App for Blue Collared

for accurate time tracking

Atendance marking app can be used by employees as well as supervisors, where employee can only just log him in, supervisors can use this app to mark their attendance as well as to mark others attendance and to even take group attendance. Along with this they have an quick access to all employees logs, leaves and all of the insights which makes their life a bit more easy.





One stop solution for employees & supervisors

What is this app?

The application solution for employees and supervisors enables accurate time tracking hence helps in generating correct muster roll (attendance report) which leads to the accurate salary disbursal of all blue collared employees. It's geo-fencing property allows the user to mark his attendance only when he's inside the geo-fencing area which is inside the site or nearby the assigned site.

What we did

Scope of work & timeline

The project involved a Product designer and a UX designer who worked synergistically in order to build an innovative solution. Our Business and Growth team was constantly in touch powering us with valuable insights.

Research

Both desk and user research were conducted to cover the whole spectrum of perspectives necessary to develop a fully fledged strategy.

UX design

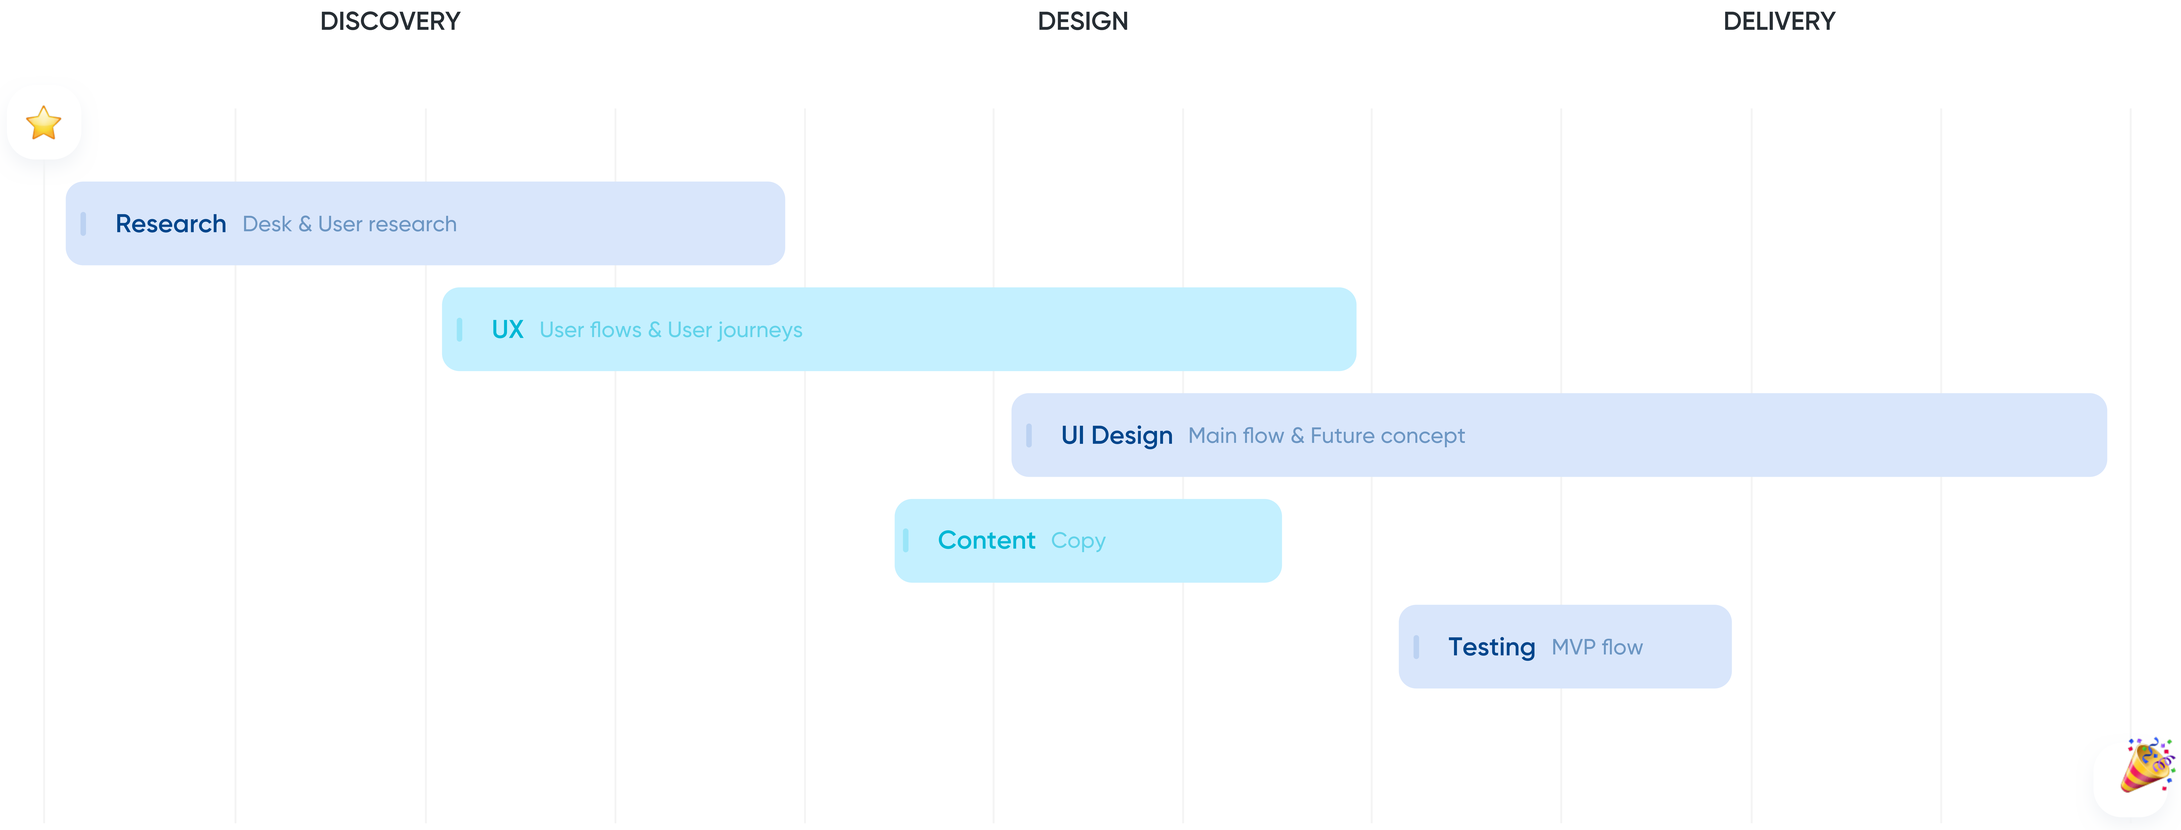
After a thorough understanding of the status quo, user stories were generated followed by user flows detailing the full user journey.

UI or Visual design

With the solid basis of UX findings, the visual part of the app was designed, including ideas for possible interactions.

Prototype testing

As the product is still in building phase, a strategy for usability testing was made on selected user flows to make sure the solution was user friendly and appealing.



Start

Project goals

01

Efficient

An efficient and smart solution for payroll generation

02

Time saving

Save time by automating the process of attendance management

03

Accurate

Accurate time tracking, report genration and overtime estimates

04

No forgery

Geo-fencing & Liveliness check prevents chances of forgery

05

Reports/ payroll

Transparent real time report generation leads to accurate payroll

Challenges

Attendance marking

- No acknowledgm e-nt system
- No notification system
- Overtime isn't getting tracked and paid
- Not all employees have cell phones
- Lot of forgery in the system
- Face registeration is a problem

Rostering

- Rostering is being used only to mark week offs
- System is not clear and self explanatory
- Lot of clicks on roster
- Late employees are getting marked absent
- System lag and network issues
- CTA's are not clear

Reporting

- Clients don't know how to download reports
- Half filled details from client side
- No standardizatio n of the data format
- Managing reports manually
- Duplicacy of employee entry
- Problem is downloading reports

Leave management

- There's no approval system
- Leave management system is not there
- System is not user friendly

User personas

Persona 1

Site Employee

Age: **28**

Gender: **Male**

Qualification: **12th**

Experience: **2 yrs**

Works 9 hrs a day performing his duties

Industry: **Hospitality**

Reasons to use current product

- To mark his attendance
- To check his logs

Reasons for need of a new product

- Problems in marking attendance with current product
- To apply leaves through app and check status of leaves.
- To check total hours worked.
- Get paid deserving salary without getting cheated.

Personality

- loyal
- Humble
- Hard working

Other digital products they use extensively

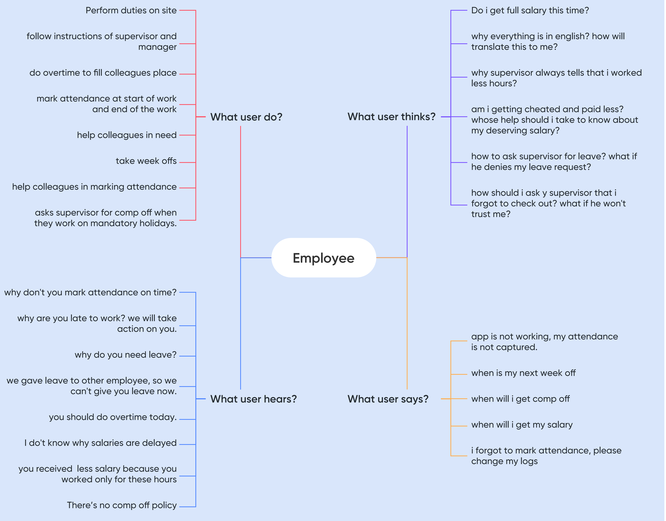
- Youtube
- Tik Tok
- Instagram
- Facebook

Readiness to accept new product (0-5)

3/5

Techsaviness

Need learning to use nay new tech



Conclusive points

- User most of the time worry about missing attendance and app failures.
- User most of the times worry about not receiving salary on time.
- User most of the time worry about receiving less salary or salary cut.
- User doesn't understand huge amount of texts, as they have limited reading skills.

Persona 2

Site Supervisor

Age: **42**

Gender: **Male**

Qualification: **B.tech**

Experience: **5 yrs**

Works 9 hrs a day performing his duties

Industry: **Hospitality**

Reasons to use current product

- To mark his own as well as of others attendance
- To track his employees log
- To generate and forward different reports

Reasons for need of a new product

- Smart way of marking attendance
- Reduce manual work load
- Need leave management system
- To get a better view of insights on his site

Personality

- Friendly
- Cheerful
- Helpful

Other digital products they use extensively

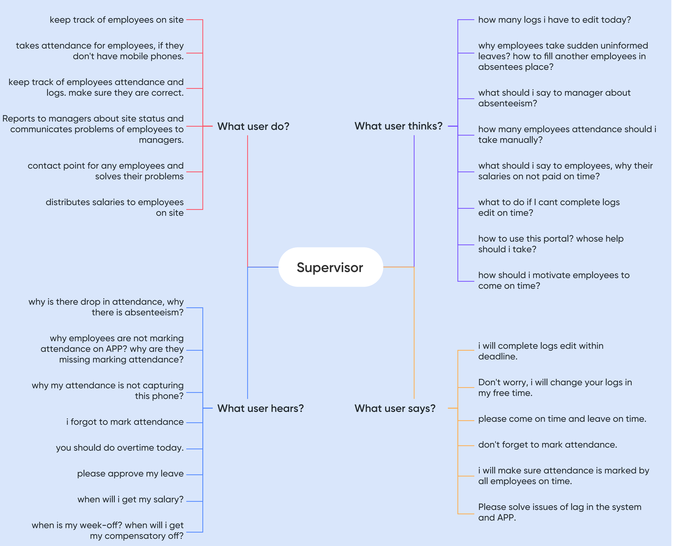
- Youtube
- Ola/ Uber
- Banking apps/ sites
- Facebook

Readiness to accept new product (0-5)

4/5

Techsaviness

Comfortable with all tech

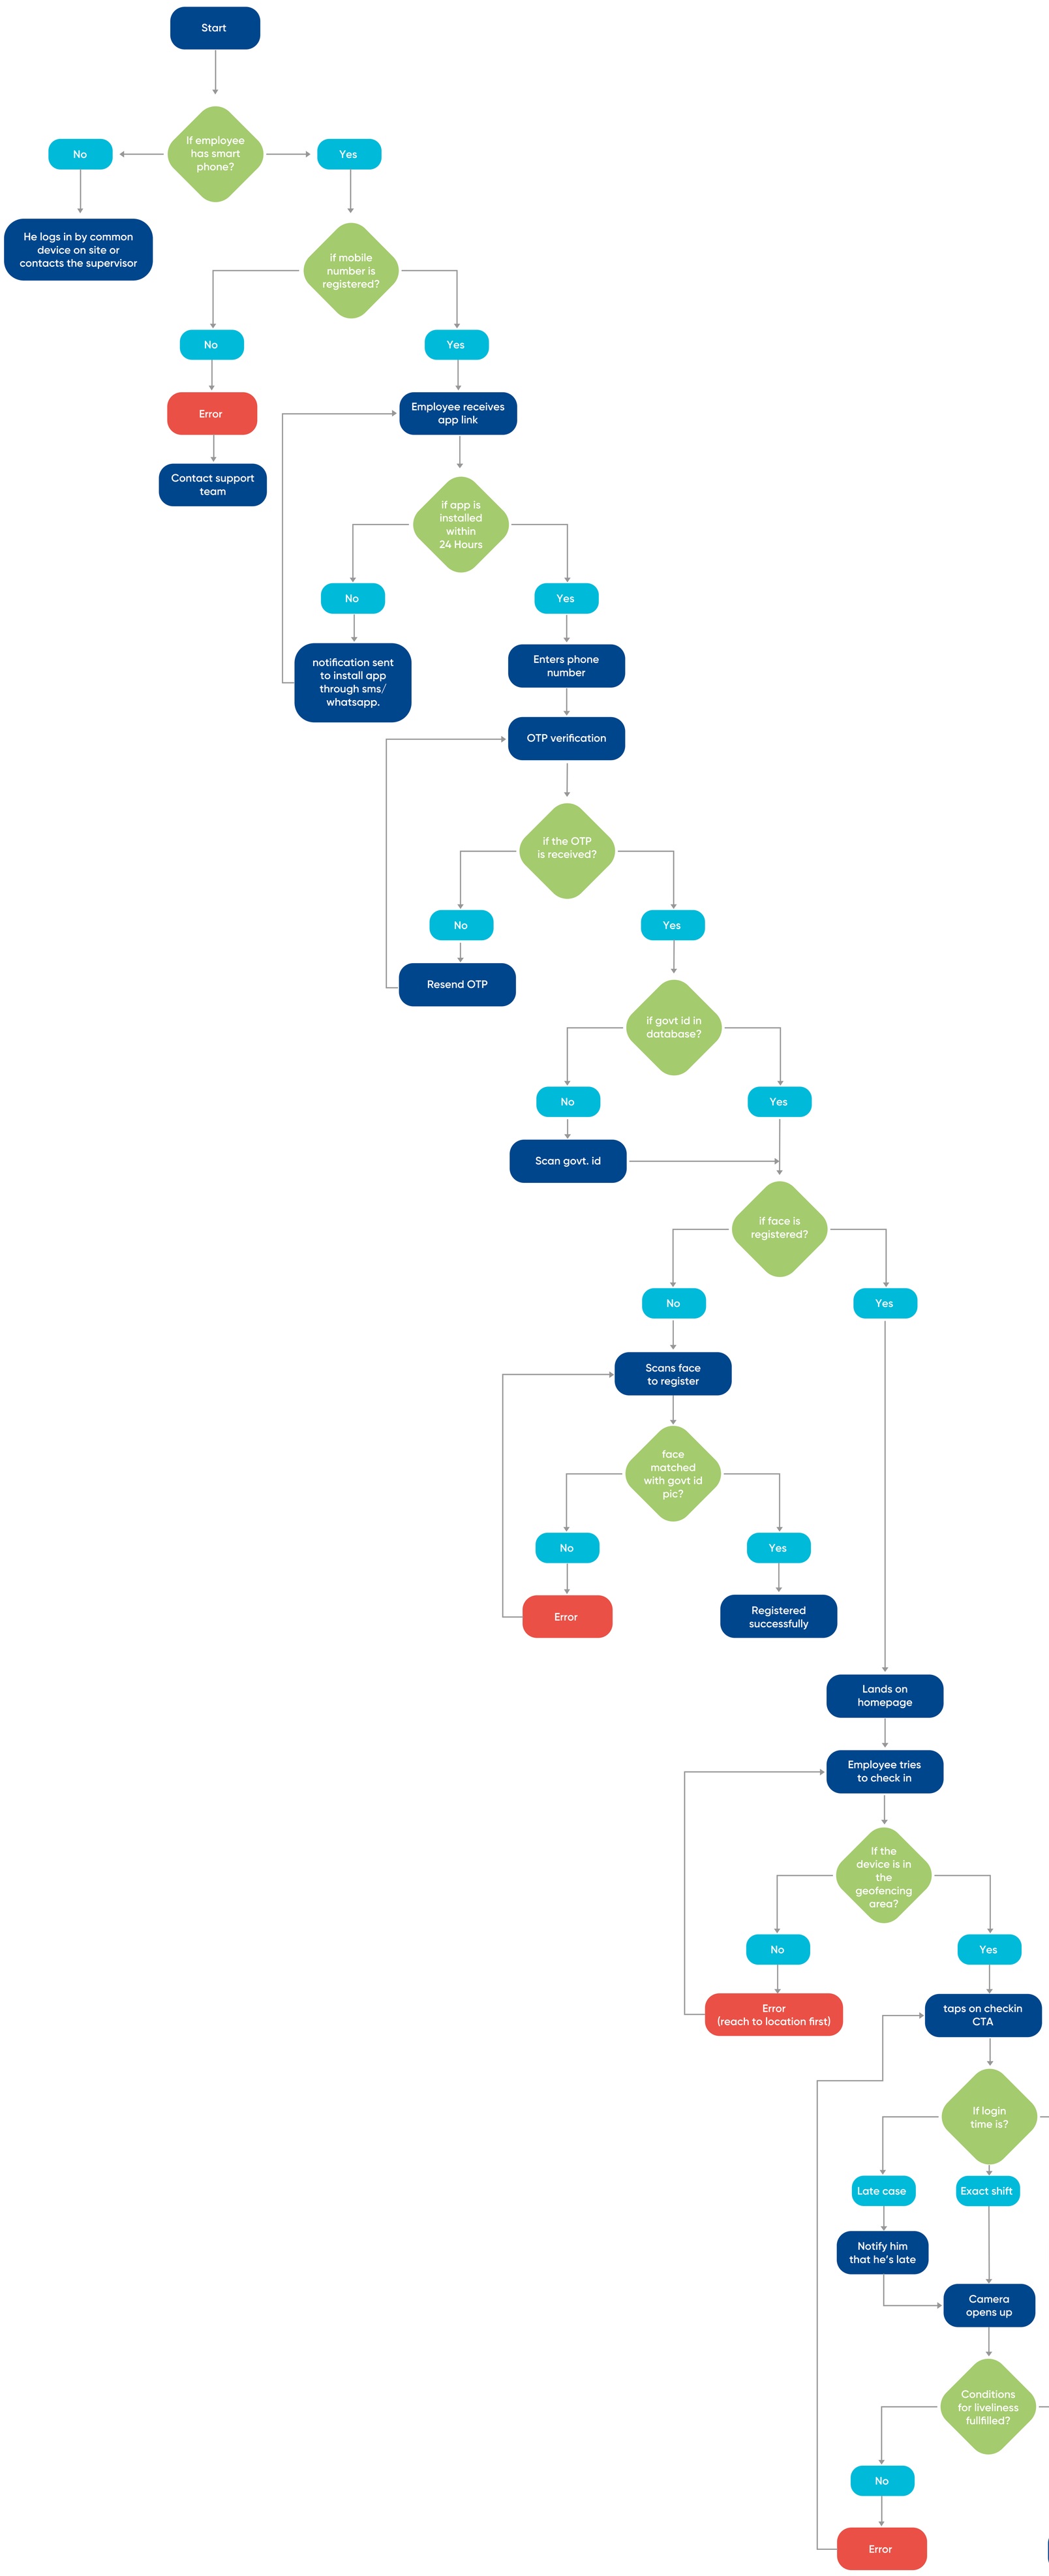


Conclusive points

- Supervisor has to juggle between many tasks, managing employees on site to reporting to manager.
- Supervisor gets overwhelmed with work burden and struggles to finish work within deadline.
- Supervisor worries about system issues and APP issues as it increases manual work for them
- Supervisor is answerable to managers and as well as employees, he is common contact point for both of them.

User information flows

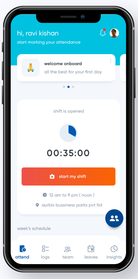
Basic login flow (emp+sup)



Solution

Accurate & efficient attendance

Last destination for enterprises as well as SMEs with blue-collar employees to have this app as their one stop solution for managing their workforce and for making payment to their employees or third-party vendors.

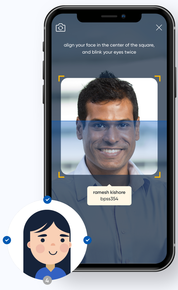


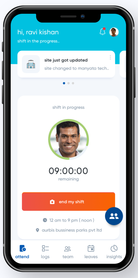
Dedicated area for contexual notifications

Employees and supervisors can recieve contextual and personalized push notifications which gets you closer to your user. It enables the action you need from them thus resulting in better performance

Liveliness check feature for face detection

Along with geo-fencing technology, the app is embedded with liveliness check feature which leads to less forgery in system along with interactive interactions to guide the user how to proceed.



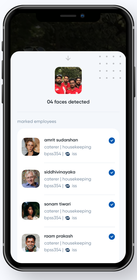


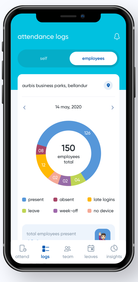
Shift progress & overtime tracking

Employees can track their working hours and receives notification when their overtime is about to start, once employee starts working overtime it gets calculated in system and reflects in muster roll thus employee gets the

Capture group attendance too

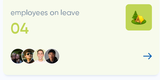
Supervisor can also capture the attendance of multiple people. In blue collared industry lot of people don't own a personal mobile phone, in that case supervisor can help them check in.





Access to self and employees log

Supervisor can check his weekly as well as monthly log report, also have an access to check the logs of all the employees at the site. He can also get a combined insight report on the attendance information of the employees.



Take an action on the leaves

Supervisors can approve, decline or escalate leave request from the employees. They can also apply for a leave themselves.
